SomaPRO Learning Management System - User Guide

Overview

SomaPRO is a comprehensive Learning Management System (LMS) that facilitates online education through a structured workflow. The system supports multiple user roles: **Students**, **Teachers**, **Administrators**, and **Managers**.

Part 1: Pre-LMS Process (Eligibility)

Before using the system, each role must meet specific eligibility requirements.

Role	Eligibility Process
Admin	The Admin is pre-registered in the system and has all rights to register teachers and students, as well as create courses and content.
Student	Pays a registration fee manually to become eligible. Once registered by the Admin, the student is issued SomaPRO login credentials.
Teacher	Goes through a recruitment process and pays a registration fee. Once registered by the Admin, the teacher is issued SomaPRO login credentials.

Part 2: A Practical Walkthrough

This guide uses a real-world example to walk you through the core workflows.

- **Course:** Cyber Security Fundamentals

- **Role-based Activities:**

- Admin sets up the course.
 - Teacher creates the content.
 - Student enrolls and learns.
 - Teacher grades assignments.
 - Admin views reports.
-

Part 3: Getting Started – Registration & Login

3.1 Admin Login

1. Log in as the Admin using the default credentials provided by your system administrator.
 - **Username:** semeon@somapro.com
 - **Password:** Semeon@123

3.2 Register a Teacher

1. In the Admin panel, expand the **Teachers** menu.
2. Click **Manage Teachers** → **Add Teacher**.
3. Fill in the teacher's full name as Steven Omondi and email address as steve@somapro.com.
4. Assign a temporary password as Steve@123. The teacher can change this later.
5. Click **Save**. The teacher is now in the system.

3.3 Register a Student

1. Expand the **Students** menu.
2. Click **Manage Students** → **Add Student**.
3. Fill in the student's full name as William Ruto, email address as william@somapro.com, and academic qualifications (choose anything relevant to Cyber Security, that's our case study).
 - *Note: Qualifications help the Admin when approving course enrollments.*
4. Assign a temporary password (as William@123). The student can change this later.
5. Click **Save**. The student is now in the system.

3.4 Create a Course

1. Navigate to **Manage Courses** → **Create Course**.
2. Fill in the course details using the example below:

Field	Example Value
Title	Cyber Security Fundamentals
Short name	CSF101
Description	Master the essentials of cyber security including threat detection, network security, ethical hacking, and incident response.
Category	Cyber Security
Price	15000 KES (or 0 for a free course)
Currency	KES
Start Date	2026-06-01
End Date	2026-08-31
Visibility	Public
Status	Draft (you can publish it later)

3. Click **Create Course**.
 - *Result: You now have a draft course. Once published, students can browse and apply for enrollment.*

3.5 Assign a Course to a Teacher

1. Go to **Admin** → Expand **Teachers** → Click **Assign Courses**.
 2. Select the teacher (e.g., Jane Instructor).
 3. Select the course (e.g., Cyber Security Fundamentals).
 4. Click **Assign Course**.
- *Result: The teacher can now manage the course content and grade students.*
-

Part 4: Add Course Content (Course Management)

In this section, you will build sections, lessons, a quiz, and an assignment for the *Cyber Security Fundamentals* course.

4.1 Access Course Management

1. Navigate to **Course Management**.
2. Select **Cyber Security Fundamentals**.
3. Click the **Manage Course Content** button.

4.2 Build Course Sections and Lessons

Follow these steps in order. Click **Save** after adding each section.

Section 1: Introduction to Cyber Security (Week 1-2)

1. Click **Add Section**.
 - **Section:** Section 1
 - **Description:** Introduction to Cyber Security (Week 1-2)
 - Click **Save**.
2. Click **Add Lesson** (Text Content).
 - **Lesson Title:** Lesson 1.1: What is Cyber Security?
 - **Lesson Type:** Text Content
 - **Content:** Paste the HTML below:

html

```
<h1>Understanding Cyber Security</h1>
<p>Cyber security protects internet-connected systems from cyber threats.</p>
<h2>Key Pillars of Cyber Security:</h2>
```

```
<ul>
  <li><strong>Confidentiality</strong> - Ensuring data is accessible only to authoriz
ed users</li>
  <li><strong>Integrity</strong> - Maintaining accuracy and completeness of data</li>
  <li><strong>Availability</strong> - Ensuring reliable access to data when needed</l
i>
</ul>
<h2>Common Cyber Threats:</h2>
<ul>
  <li>Malware (Viruses, Worms, Trojans)</li>
  <li>Phishing Attacks</li>
  <li>Man-in-the-Middle (MITM) Attacks</li>
  <li>Denial-of-Service (DoS) Attacks</li>
  <li>SQL Injection</li>
</ul>
<div class="bg-yellow-50 p-4 rounded-lg mt-4">
  <strong>🌐 Real-World Stat:</strong> Cybercrime damages are projected to reach $10.
5 trillion annually by 2025.
</div>
```

- **Duration:** 15 minutes
- **Mandatory:** Yes
- 3. Click **Add Lesson** (Video).
 - **Lesson Title:** Lesson 1.2: History of Cyber Threats
 - **Lesson Type:** Video
 - **Description:** Learn about major cyber attacks from the Morris Worm (1988) to modern ransomware attacks.
 - **Video URL:** <https://www.youtube.com/embed/6JwWbPv-Vqc>
- 4. Click **Add Lesson** (Quiz).
 - **Lesson Title:** Cyber Security Quiz 1
 - **Lesson Type:** Quiz
 - **Duration:** 15 minutes
 - **Passing Score:** 70%
 - **Questions:** Copy and paste the following:
 1. What does CIA stand for in cyber security?
 - A) Central Intelligence Agency
 - B) Confidentiality, Integrity, Availability ✓
 - C) Code, Internet, Access
 2. Which attack floods a network with traffic to make it unavailable?
 - A) Phishing

- B) DDoS (Distributed Denial of Service) ✓
 - C) Malware
3. What was the first computer virus called?
- A) ILOVEYOU
 - B) Morris Worm ✓
 - C) Blaster

Section 2: Network Security (Week 3-4)

1. Click **Add Section** at the top.
 - **Section:** Section 2
 - **Description:** Network Security (Week 3-4)
 - Click **Save**.
2. Click **Add Lesson** (Text Content).
 - **Lesson Title:** Lesson 2.1: Network Security Fundamentals
 - **Lesson Type:** Text Content
 - **Content:** Paste the HTML below:

html

```
<h1>Protecting Network Infrastructure</h1>
<h2>Firewalls</h2>
<p>Firewalls monitor incoming/outgoing traffic based on security rules.</p>
<pre><code># Linux iptables example
iptables -A INPUT -s 192.168.1.100 -j DROP</code></pre>
<h2>Intrusion Detection Systems (IDS)</h2>
<p>IDS monitors network traffic for suspicious activity.</p>
<h2>Virtual Private Networks (VPN)</h2>
<p>VPNs encrypt internet traffic and hide IP addresses.</p>
<h2>Best Practices:</h2>
<ul>
  <li>Change default passwords immediately</li>
  <li>Use network segmentation</li>
  <li>Implement principle of least privilege</li>
  <li>Regular security audits</li>
</ul>
```

- **Duration:** 25 minutes
 - **Mandatory:** Yes
3. Click **Add Lesson** (Video).
 - **Lesson Title:** Lesson 2.2: Setting Up a Basic Firewall

- **Lesson Type:** Video
- **Video URL:** <https://www.youtube.com/embed/kD3Cy2R1h3A>
- **Description:** Step-by-step guide to configuring UFW (Uncomplicated Firewall) on Ubuntu Linux.
- 4. Click **Add Lesson** (Assignment).
 - **Lesson Title:** Lesson 2.3: Network Security Assignment
 - **Lesson Type:** Assignment
 - **Due Date:** 7 days from now
 - **Description:** You are the IT security manager for a small company with 50 employees. Create a comprehensive network security plan including:
 - Firewall rules (allow HTTP/HTTPS, block FTP/Telnet)
 - VPN implementation strategy
 - Employee security training outline
 - Incident response procedure for a suspected breach
 - **Submission Format:** PDF or Word document (max 5 pages)
 - **Duration:** 30 minutes
 - **Mandatory:** Yes

Section 3: Ethical Hacking & Penetration Testing (Week 5-6)

1. Click **Add Section**.
 - **Section:** Section 3
 - **Description:** Ethical Hacking & Penetration Testing (Week 5-6)
 - Click **Save**.
2. Click **Add Lesson** (Text Content).
 - **Lesson Title:** Lesson 3.1: Introduction to Ethical Hacking
 - **Lesson Type:** Text Content
 - **Content:** Paste the HTML below:

```
html

<h1>Ethical Hacking Methodology</h1>
<h2>Five Phases of Ethical Hacking:</h2>
<ol>
  <li><strong>Reconnaissance</strong> - Gathering information about the target</li>
  <li><strong>Scanning</strong> - Identifying open ports and services</li>
  <li><strong>Gaining Access</strong> - Exploiting vulnerabilities</li>
  <li><strong>Maintaining Access</strong> - Establishing persistence</li>
  <li><strong>Covering Tracks</strong> - Removing evidence</li>
</ol>
<h2>Essential Tools:</h2>
```

```
<ul>
  <li>Nmap - Network mapping</li>
  <li>Wireshark - Packet analysis</li>
  <li>Metasploit - Exploit framework</li>
  <li>Burp Suite - Web app testing</li>
</ul>
<div class="bg-green-50 p-4 rounded-lg">
  <strong></strong> Legal Note:</strong> Always obtain written permission before testing any
  system you don't own!
</div>
```

- **Duration:** 20 minutes
- **Mandatory:** Yes
- 3. Click **Add Lesson** (Video).
 - **Lesson Title:** Lesson 3.2: Using Nmap for Network Scanning
 - **Lesson Type:** Video
 - **Video URL:** <https://www.youtube.com/embed/4t4kBkMs4ZQ>
 - **Description:** Practical demonstration of Nmap commands for network discovery and security auditing.
 - **Duration:** 25 minutes
 - **Mandatory:** Yes
- 4. Click **Add Lesson** (Assignment).
 - **Lesson Title:** Lesson 3.3: Vulnerability Assessment Lab
 - **Lesson Type:** Assignment
 - **Due Date:** 10 days from now
 - **Description:** Using a provided vulnerable VM (Metasploitable), perform a vulnerability assessment:
 1. Scan for open ports using Nmap
 2. Identify vulnerable services
 3. Research potential exploits
 4. Write a professional report with:
 - Executive summary
 - Methodology
 - Findings (ranked by severity)
 - Recommendations
- 5. Click **Add Lesson** (Quiz).
 - **Lesson Title:** Lesson 3.4: Ethical Hacking Quiz
 - **Lesson Type:** Quiz
 - **Duration:** 20 minutes
 - **Questions:** Copy and paste the following:

1. Which tool is used for packet analysis?
 - A) Nmap
 - B) Wireshark ✓
 - C) John the Ripper
2. What is the correct order of ethical hacking phases?
 - A) Scanning → Reconnaissance → Gaining Access → Maintaining Access → Covering Tracks
 - B) Reconnaissance → Scanning → Gaining Access → Maintaining Access → Covering Tracks ✓
 - C) Gaining Access → Scanning → Reconnaissance → Maintaining Access → Covering Tracks
3. Which port does HTTPS use by default?
 - A) 80
 - B) 443 ✓
 - C) 22

Section 4: Incident Response & Forensics (Week 7-8)

1. Click **Add Section**.
 - **Section:** Section 4
 - **Description:** Incident Response & Forensics (Week 7-8)
 - Click **Save**.
2. Click **Add Lesson** (Text Content).
 - **Lesson Title:** Lesson 4.1: Incident Response Lifecycle
 - **Lesson Type:** Text Content
 - **Content:** Paste the HTML below:

```
html

<h1>NIST Incident Response Framework</h1>
<h2>Four Phases:</h2>
<ol>
  <li><strong>Preparation</strong> - Tools, procedures, team training</li>
  <li><strong>Detection & Analysis</strong> - Identify potential incidents</li>
  <li><strong>Containment, Eradication & Recovery</strong> - Stop the attack, remove threats, restore systems</li>
  <li><strong>Post-Incident Activity</strong> - Lessons learned, improve security</li>
</ol>
<h2>Incident Response Team Roles:</h2>
<ul>
```

```
<li>Incident Manager</li>
<li>Technical Lead</li>
<li>Communications Lead</li>
<li>Legal/Compliance Advisor</li>
</ul>
<h2>Key Metrics:</h2>
<ul>
  <li>MTTD (Mean Time to Detect)</li>
  <li>MTTR (Mean Time to Respond)</li>
  <li>MTTC (Mean Time to Contain)</li>
</ul>
```

- **Duration:** 20 minutes
- **Mandatory:** Yes
- 3. Click **Add Lesson** (Video).
 - **Lesson Title:** Lesson 4.2: Digital Forensics Basics
 - **Lesson Type:** Video
 - **Video URL:** <https://www.youtube.com/embed/H7qXvIYHcTo>
 - **Description:** Learn the fundamentals of digital forensics including evidence collection, chain of custody, and forensic imaging.
 - **Duration:** 30 minutes
 - **Mandatory:** Yes
- 4. Click **Add Lesson** (Assignment).
 - **Lesson Title:** Lesson 4.3: Incident Response Plan
 - **Lesson Type:** Assignment
 - **Due Date:** 14 days from now
 - **Description:** Develop a comprehensive incident response plan for a medium-sized e-commerce company:
 - Incident response team structure
 - Communication plan (internal and external)
 - Step-by-step procedures for: Ransomware attack, Data breach, DDoS attack
 - Recovery strategy
 - Post-incident review process
- 5. Click **Add Lesson** (Assignment).
 - **Lesson Title:** Lesson 4.4: Final Project - Complete Security Audit
 - **Lesson Type:** Assignment
 - **Due Date:** 21 days from now
 - **Max Score:** 200
 - **Description:** Conduct a complete security audit for a simulated company scenario:

1. **Network Security Assessment:** Firewall config, wireless security, VPN check.
2. **Application Security Review:** Web app scan, code review, API security.
3. **Policy & Compliance Check:** Password policy, access control, GDPR/HIPAA.
4. **Final Report Requirements:**
 - Executive summary (for management)
 - Technical findings (for IT team)
 - Risk matrix with priority levels
 - Actionable recommendations with timelines
 - Budget estimates for critical fixes
- **Submission Format:** Comprehensive PDF report (15-20 pages) + supporting evidence files.

4.3 Publish the Course

After adding all lessons, go back to the main course page and change the **Status** from *Draft* to **Published**.

- *Result: Students can now see and apply for the course.*
-

Part 5: Student – Enrollment & Learning

This section walks through the process of applying for a course, getting approved, and starting to learn.

5.1 Student: Apply for a Course

1. **Log out** as Admin.
2. **Log in** as a Student using the credentials you created earlier (e.g., `steve@somapro.com` / `Steve@123`).
3. Go to **Courses** → **Browse Courses**.
4. Find **Cyber Security Fundamentals** and click **Apply**.
5. On the checkout page, select **Full amount**.
6. For **Payment Method**, select **Cash Transfer**.
7. Enter a Receipt Number (e.g., `RCT-001`).
8. Click **Pay**.
- *Result: Your application is now pending Admin approval.*

5.2 Admin: Approve Enrollment

1. **Log out** as Student.
2. **Log in** as Admin.
3. Navigate to **Students** → **Enroll Students** → **Review**.
4. A pop-up will show the student's profile, including qualifications and fee status. Use this to decide whether to approve.
5. Click **Enroll Student**.
 - *Result: The student is now admitted to the course and can access the learning materials.*

5.3 Student: Start Learning

1. **Log out** as Admin.
2. **Log in** again as Student.
3. Go to **Courses** → **My Courses**.
4. Click on **Cyber Security Fundamentals** → **Start Learning**.
 - **Congratulations! You are now at the heart of SomaPRO LMS.**
5. Expand the sections and go through the lessons in order.
 - **Text/Video Lessons:** Are marked as **complete automatically** when viewed.
 - **Quiz:** Answer the questions, then click submit. You will see your score and feedback instantly.
 - **Assignment:** Click **Submit**, upload your file (e.g., `bio.html`), and confirm the submission.

5.4 Student: Track Progress

- Your **Dashboard** shows your course progress as a percentage.
- The **Grades** page displays your quiz scores and assignment grades (once the teacher has marked them).

Part 6: Teacher – Grading & Feedback

This section shows how to grade a student's assignment and provide feedback.

6.1 View Pending Submissions

1. **Log in** as a Teacher using the credentials you created earlier.
2. On the **Teacher Dashboard**, look for the **Pending Grading** widget.
3. Alternatively, click **Grading** from the sidebar menu.
4. Select **Cyber Security Fundamentals** → **Network Security Assignment**.

6.2 Grade an Assignment

1. Open a student's submission (you can view the file or inline text).
 2. Enter a **grade** (e.g., 85).
 3. Enter **written feedback** (e.g., "Good structure, but add more semantic tags.").
 4. Click **Save Grade**.
- *Note: The student is notified automatically.*

6.3 View Overall Class Performance

- Go to **Reports** → **Course Analytics** for *Cyber Security Fundamentals* to see average scores and completion rates.
 - The **Student Performance** report lists each student's individual progress and grades.
-

Part 7: Reports for All Roles

Student Reports

- **Progress Report:** Shows percentage complete per course.
- **Grade Report:** Lists all quiz and assignment grades with letter equivalents.
- **Assignment Report:** Overview of submitted vs. pending assignments.

Teacher Reports

- **Course Analytics:** Engagement metrics and lesson completion heatmap.
- **Student Performance:** Drill down into individual student activity.
- **Assignment Analysis:** Grade distribution and submission rates by deadline.

Admin Reports

- **Financial Reports:** Total revenue, monthly trends, and payment list.
- **System Insights:** Enrollment counts, popular courses, and average grades across the platform.

Tip: All reports can be filtered by date and exported (CSV/PDF) for offline analysis.

Part 8: Summary of Practical Steps

Role	Action	Expected Result
Admin	Create <i>Cyber Security Fundamentals</i> course and assign a Teacher.	Course appears in the teacher's management list.
Teacher	Add all sections, lessons, a quiz, and an assignment.	Course content is fully built.
Student	Enroll, complete the quiz, and submit the assignment.	Progress updates, quiz score shown instantly.
Teacher	Grade the assignment and leave feedback.	Student sees their grade and comments.
Admin	View the finance report.	Total revenue is displayed cleanly (e.g., KES 15,000).

CONGRATULATIONS! END OF USER GUIDE

(Check Bonus information below...)

Part 9: Bonus Content

9.1 Sample Learning Path (8 Weeks)

Weeks	Activities
Week 1-2	Complete Section 1 (Introduction). Take Quiz 1 (must score 70%+ to proceed). Watch video lessons.
Week 3-4	Complete Section 2 (Network Security). Submit Network Security Assignment. Await grading.
Week 5-6	Complete Section 3 (Ethical Hacking). Submit Vulnerability Assessment. Take Quiz 2.
Week 7-8	Complete Section 4 (Incident Response). Submit Incident Response Plan. Submit Final Project.

9.2 Teacher Grading Rubric

Assignment 1: Network Security Plan (100 points)

- Firewall rules: 25 points

- VPN strategy: 20 points
- Training outline: 20 points
- Incident response procedure: 25 points
- Professional presentation: 10 points

Assignment 2: Vulnerability Assessment (100 points)

- Nmap scan results: 20 points
- Identified vulnerabilities: 30 points
- Risk assessment: 20 points
- Remediation recommendations: 20 points
- Report quality: 10 points

Final Project: Security Audit (200 points)

- Network assessment: 50 points
- Application security: 50 points
- Policy review: 40 points
- Risk matrix: 30 points
- Recommendations: 20 points
- Professional presentation: 10 points

9.3 Grade Calculation & Scale

Component	Weight
Quiz 1	5%
Quiz 2	5%
Assignment 1	15%
Assignment 2	20%
Assignment 3 (IR Plan)	15%
Final Project	30%

Component	Weight
-----------	--------

Participation/Completion	10%
--------------------------	-----

Grade Scale:

- **A:** 90-100% (Outstanding)
- **B:** 80-89% (Above Average)
- **C:** 70-79% (Satisfactory)
- **D:** 60-69% (Passing)
- **F:** Below 60% (Fail - Retake Required)

9.4 System Flow Diagram

Need Help?

- **Documentation:** Visit `/help` within the application.
 - **Support:** Contact your system administrator.
 - **Feature Suggestions:** Use the feedback form in **Settings**.
-

Congratulations! You have completed the SomaPRO User Guide.
